SUDHIR MEENA

Senior Associate Technology L1

Email: sudhirmeena230995@gmail.com	Phone: +91-7850905317	**LinkedIn:** linkedin.com/in/sudhir-meena-b29982b7/
GitHub: @sudhir512kj	**Portfolio:** sudhirmeenaswe.netlify.app	

SUMMARY

Sudhir Meena is a results-driven **Software Engineer and emerging Technology Leader** with **6+ years** of experience **designing**, **architecting**, and **delivering highly scalable, secure, and resilient enterprise systems** across **FinTech**, **Retail**, **Conversational AI**, and **Cloud-native platforms**. Demonstrates deep expertise in **Java**, **Spring Boot**, **Microservices**, **Golang**, **Python**, and **distributed system design**, consistently enabling **high-performance**, **low-latency** applications that support **large-scale user bases**.
Specializes in building cloud-native platforms on **AWS**, **Azure**, and **GCP** with strong focus on **scalability**, **reliability**, **performance optimization**, and **application security**. Adept at designing microservices architectures, implementing event-driven systems, and modernizing legacy workloads using **Kubernetes**, **Docker**, **Kafka**, and **DevOps** automation.
A proven contributor in end-to-end engineering, leading cross-functional teams, mentoring developers, and collaborating with global stakeholders to translate business needs into robust technical solutions. Known for improving system performance, reducing latency, and enhancing platform reliability through architectural improvements and modern engineering practices.

CORE COMPETENCIES

Software Engineering

- **Software Engineering & Architecture**– Enterprise Java, Microservices, Distributed Systems, Concurrency, REST APIs, System Design (HLD/LLD)
- **Cloud & DevOps**– Hands on experience in AWS, Azure, GCP, Docker, Kubernetes, Helm, Terraform, CI/CD Automation
- **Performance, Reliability & Observability**– Hand on experience in Kafka, Redis, MongoDB, Cassandra, PostgreSQL, Grafana, Prometheus, ELK
- **Security & Modern Engineering**– Experience in Application Security, Cloud Security, TDD, DDD, GenAI-assisted development
- **Legacy Modernization** – Skilled in migrating Scala, legacy Java, and mainframe systems to modern Spring Boot–based digital APIs.

TECHNICAL SKILLS

Backend Engineering: Java, Spring Boot, Golang, Python, Django, FastAPI, Flask
Frontend: React, HTML, CSS
Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, Cassandra
Messaging & Caching: Kafka, Redis, gRPC
Cloud Platforms: AWS (Compute, Networking, Storage, Kubernetes, Security), Azure (Compute, Networking, Storage, Kubernetes, Security), GCP (Compute, Networking, Storage, Kubernetes, Security)
DevOps & Infra: Docker, Kubernetes, Helm, Terraform, GitHub, GitLab
Monitoring: Grafana, Prometheus, ELK Stack
Testing & Quality: Unit Testing, Integration Testing, Contract Testing

CERTIFICATION/TRAINING

Microsoft Azure Fundamentals
Microsoft

Salesforce Certified Platform Developer 1
Salesforce

Google Cybersecurity Specialization
Google

Deep Learning Specialization
DeepLearning.ai

NOTABLE ACCOMPLISHMENTS

- **Architected a cloud-native PaaS platform at Persistent Systems achieving 50% scalability improvement and 99.9% reliability.**
- Upgraded IBM Cloud DB2 Warehouse using Kubernetes Operators & Golang, boosting performance by **40%** and reducing downtime by **25%**.
- Built Confidential Managed Environments (CME) on Azure & AWS, improving security compliance by **40%**.
- Designed distributed chatbot systems at Yellow.ai handling **100K+ concurrent users**, improving reliability by **40%** and reducing latency by **30%**.
- Delivered low-latency retail backend at Fraazo serving **50K+ daily active users** with **30% faster response times**.
- Developed Web3 decentralized applications and multi-currency payment systems increasing engagement and efficiency by **25–30%**.
- Built high-performance crypto trading & exchange platforms supporting **10,000+ TPS**.

WORK EXPERIENCE

Publicis Sapient, Gurugram **Oct 2025 – Present**

Senior Associate Technology L1
Responsibilities:

- Engineered a next-generation FinTech platform using Java, Spring Boot, and AWS, improving processing speed by 30%.
- Designed scalable microservices ensuring high availability, security, and performance.
- Collaborated with global teams to deliver enterprise-grade, production-ready solutions.

Persistent Systems, Gurugram **July 2023 – Sep 2025**

Lead Software Engineer
Responsibilities:

- **OutSystems:** Architected a multi-tenant **Low-Code PaaS** on hybrid cloud with automated cluster provisioning, while developing a custom **Contract Testing framework** using **Golang, Java, and C#**.

- **Intuit:** Developed containerized **AWS Lambda** functions via **AWS CDK** to sync data between Salesforce Orgs, processing **100k+ records daily** with **10k+ queries per hour**.
- **Skyflow:** Built a secure database (SaaS Product) for structured/unstructured data and a **Credentials Management Engine** using **gRPC** for multi-cloud key management and **BYOK** support.
- **IBM:** Optimized **DB2 Warehouse** performance by **40%** by developing custom **Kubernetes Operators** in **Golang**, reducing downtime by **25%**.
- **HealthTech:** Streamlined hybrid cloud deployments by creating an **IaC utility** to automate dynamic **CIDR range** allocation across infrastructure environments.

Yellow.ai, Bangalore **Sep 2022 – Mar 2023**

Senior Software Engineer
Responsibilities:

- **DANA:** Developed a distributed chatbot using **Java, Python, and NoSQL**, implementing complex workflows to support **100k+ concurrent users**.
- **Customer Support AI:** Engineered an AI support bot integrated with **Zendesk and UiPath** for real-time issue resolution, increasing engagement by **40%**.
- **Optimization:** Reduced response latency by **30%** and improved system reliability by **40%** through microservices refactoring and optimized pipelines.

Fraazo, Mumbai **Jan 2022 – Sep 2022**

Senior Software Engineer
Responsibilities:

- **Inventory & Logistics:** Built **Inventory Management APIs** with complex SQL reporting for Dark Store operations and integrated an automated test generation library for higher reliability.
- **Rider Operations:** Developed the **Rider App backend** for real-time activity tracking, duty hour management, and automated incentive calculations for **50k+ DAUs**.
- **Architecture:** Integrated **Kafka and gRPC** to handle real-time order processing at ultra-low latency, ensuring 99.9% uptime during high-traffic peak sales.

Paxcom India (A Paymentus Company), Gurugram. **Nov 2020 – Dec 2021**

Software Engineer
Responsibilities:

- **AI Knowledge Base:** Built an internal chatbot using **IBM Watson AI and MongoDB** to index web-based data, with a full-stack interface developed in **React**.
- **Dental Booking Platform:** Developed an AI-driven booking chatbot for localized dentist discovery and online consultations, increasing bookings by **30%**.
- **CRM:** Designed and launched a dedicated **CRM platform** to manage chatbot applications and monitor user interaction metrics.

Freelancer – Web3 & FinTech, Ajmer, Rajasthan **Jan 2020 – Oct 2020**

Software Developer
Responsibilities:

- Built 12 decentralized Web3 applications using Cosmos, Starport, Python, Java.
- Developed multi-currency payment system supporting 10+ cryptocurrencies.

Hyperstate Technologies, Pune, IN **Apr 2019 – Jul 2019**

Full Stack Developer
Responsibilities:

- **Chatbot Studio:** Developed a low-code **Chatbot Development Studio** featuring a drag-and-drop interface and a built-in **IDE** for custom logic.
- **Interactive Content:** Led full-stack development for an engagement platform used to create interactive surveys, quizzes, and shoppable video advertisements.

Coindelta, Pune, IN **Aug 2018 – Jan 2019**

Full Stack Developer
Responsibilities:

- Engineered scalable crypto exchange platform (10,000+ TPS).
- Built Flux trading platform using Golang, Gin, Vue, scaling to 10K users in 6 months.

KEY PROJECTS EXECUTED

Skyflow – Secure Data Privacy Vault (Multi-Cloud PaaS)
Organization: Persistent Systems
Tech: Java, Golang, Spring Boot, Kubernetes, Docker, AWS, Azure, PostgreSQL, MySQL, Terraform
Features: Secure data vault for storing and processing sensitive customer data with privacy-by-design principles, supporting encryption, tokenization, access control, and auditability across multi-cloud environments.
Role & Contributions:

- Designed a privacy-centric architecture providing **tokenization, encryption, and auditability** for sensitive data across multi-cloud environments.
- Strengthened **data isolation and governance** mechanisms through collaboration with security teams to ensure high platform uptime.

Confidential Managed Environments (CME) – Secure Cloud Execution Platform
Organization: Persistent Systems
Tech: Java, Spring Boot, AWS, Azure, Kubernetes, Terraform, Cloud Security Services
Features: Confidential execution environments enabling secure workload processing in isolated cloud infrastructure with enhanced encryption and access controls.
Role & Contributions:

- Architected secure execution environments that enable **isolated workload processing** with enhanced access controls.
- Integrated native cloud security services and **policy enforcement mechanisms** to ensure fault tolerance for regulated deployments.

Enterprise PaaS Platform – Multi-Cloud Application Hosting
Organization: Persistent Systems
Tech: Java, Spring Boot, Microservices, Kubernetes, Helm, AWS, Azure, PostgreSQL
Features: Enterprise-grade Platform-as-a-Service enabling deployment, scaling, and management of large-scale applications across cloud and on-prem environments.
Role & Contributions:

- Developed an enterprise-grade platform for the management of large-scale applications across **on-prem and cloud** infrastructures.
- Enabled **CI/CD automation** and **Infrastructure-as-Code (IaC)** to significantly reduce operational overhead.

DANA & FEG Conversational AI Platforms

Organization: Yellow.ai
Tech: Java, Spring Boot, Python, React, AWS, MongoDB, Microservices
Features: Enterprise conversational AI platforms supporting customer engagement through chatbots at large scale.
Role & Contributions:

- Designed **scalable APIs** and high-throughput message-processing pipelines specifically for enterprise customer engagement.
- Partnered with product and frontend teams to deliver **end-to-end conversational solutions** at a global scale.

Fraazo Retail Store Delivery Platform
Organization: Fraazo
Tech: Java, Spring Boot, Kafka, Docker, Kubernetes, AWS, MySQL, React
Features: Retail delivery backend platform supporting order processing, rider operations, inventory management, and reporting.
Role & Contributions:

- Engineered a comprehensive backend supporting **order processing, asset management, and inventory reporting**.
- Implemented an **event-driven architecture** to specifically enhance asynchronous processing for retail operations.

EDUCATION

- **Bachelor of Technology (Information Technology)** from **National Institute of Technology, Kurukshetra**, in 2018
